Greater than less than sheet ks1

Learn how to compare number sentences related to addition and subtraction using larger, smaller, and equal symbols. This lesson includes: two active videos; three See as Katie, from the secret class, using her extra knowledge and subtraction to complete the number sentences before comparing them. Asking an adult helps you get some objects to help you count, such as buttons, pieces of fruit or building blocks. The symbol $>$ means more than. $10 > 3$ means 10 is more than 3. $20 > 10$ means 20 is more than 10. This symbol $=$ means equal to. $10 = 10$ means 10 is equal to 10. $2 + 3 = 5$ means 2 tens and 3 ones means 23 is equal to 2 tens and 3 ones. This symbol $<$ means less than. $3 < 10$ means 3 is less than 10. $10 < 20$ means 10 is less than 20. The more than ($>$) and less than ($<$) symbols can also be used to describe and compare the sizes of different objects. Watch this video from BBC Bitesize to find out more. Complete these two interactive questions by placing the correct symbol in each gap. Have a go at the questions in this worksheet from Classroom Secrets. Click here for the answer sheet. Have a go at this printable worksheet from HeadStart. Click here for the answer sheet. Welcome to the Math Salamanders Greater than Less than Worksheets for 1st Grade comparing numbers up to 100. Here you will find a wide range of free printable Math Worksheets, which will help your child learn to compare and order pairs of numbers to 100 and also to use the symbols $>$, $<$, and $=$ correctly. A good visual way to describe how to use larger and fewer symbols is the mouth image of the crocodile. The crocodile is a greedy creature and will always try to eat the greatest amount, so his mouth is always faced with the greatest amount. In the above case, 15 is older than 12 so he turns to eat number 15, showing us bigger signs. In the above case, the larger number in the two numbers is 24, so he turns to eat that number, showing us less signs. There are a variety of spreadsheets on this page that all help your child learn to compare and order numbers. They are also a great introduction and easy to use larger ($>$) and less ($<$) icons. The sheets are arranged in order of difficulty with the easiest sheets first. The easiest sheets involve larger shadows of two numbers, then use the correct symbol to compare the numbers. The more difficult sheet involves evaluating expressions like $30 + 5$ and using the symbol correctly. $>$, $<$, or $=$ to say how it compares to some. Using these sheets will help your child: compare numbers with 100; use $>$ and your expression $<$; correctly compare simple numbers and expressions with each other. Start using less larger signs. Take a look at some details of our spreadsheet similar to this. This is our generator to create your own larger than spreadsheet. Our generators will create the following spreadsheets: numbers up to 8 digits up to positive and negative numbers are greater than the spreadsheet here you will find range of the Location Value worksheet. Using these sheets will help your child: find out where value to 100; Number of order to 100; counted on and back by loved ones. All free Maths papers in this section support primary math benchmarks. Here are our selections for time spreadsheets for grade 1. Using these sheets will help your child: read the hours and half the time that have passed; converting the last hour and half time to digital; Draw the clock hand correctly to mark out the past half and hour. The sheets in this section will help your child learn how to tell the time. Tell class 1 time sheets How to print or save sheets that need help with printing or saving? Follow the easy 3 steps to get your spreadsheet printed out perfectly! How do I print or save sheets that need help with printing or saving? Follow the easy 3 steps to get your spreadsheet printed out perfectly! The Math Salamander hopes you enjoy using these free printable Math spreadsheets and all our other Math games and resources. We welcome any comments about our website or spreadsheet on the Facebook comments box at the bottom of each page. Page 2 Welcome to our 2-Digit Personality Spreadsheet page. We have a lot of spreadsheets on this page to help you practice 2-digit numbering skills with 1 or 2 digits. We've divided the spreadsheets on this page into two parts: 2 digits x 1 digits (3rd grade) 2 digits x 2-digit (4th grade) Each section ends with some more complex challenge boards for more capable students. In each section, the sheets are carefully classified with the easiest sheets first. These sheets are aimed at third graders. Sheets 1 to 4 cover 15 issues; sheets 5 and 6 cover 20 issues. Worksheets 1 and 2 involve a 2-digit by-by-2 digit by 2, 3, 4, or 5. Worksheets 3 through 6 involve a two-digit number by a single digit and a growing search for more complex products. These 2-digit personality spreadsheets have been designed for more capable students who need that additional challenge! These sheets are aimed at 4th graders. Worksheet 1 includes a 2-digit replier with a smaller number and answer up to 1000. Worksheets 2 through 4 have harder-to-be-replied 2-digit numbers, and the answer is usually greater than 1000. These 2-digit personality spreadsheets have been designed for more capable students who need that additional challenge! We have multiple 2-digit character spreadsheets, including 2-digit x 3-digit by-digit by-cause issues on this page. Add Two Digit Multiplication Spreadsheets (harder) Take a look at some details of our spreadsheet similar to this. Need to create your own long or short tables quickly and easily? Our Personality spreadsheet er00 will allow you to create your own custom spreadsheets for printing, complete with answers. Here you will find a variety of personality spreadsheets help you become more proficient and accurate with your tables. Using these sheets will help your child: learn tables up to 10 x 10; understand and use different human models; solve a variety of human problems. All free Grade 3 Math spreadsheets in this section are notified by the Elementary Math Benchmark for Grade 3. Here you will find a variety of free print character games to help kids learn their human truth. Using these games will help your child learn events that cause 5×5 or 10×10 , and also to develop their memory and strategic thinking skills.
